

# Scality RING & Veritas NetBackup™

**Let's face it — content is growing exponentially today thanks in part to the video and data requirements of digital business, virtualization, cloud, big data and IoT. Ensuring that data is always available — no matter what disaster occurs — requires a complete backup solution that offers scale, integrity and speed.**

Scality and Veritas Technologies have partnered to build a joint enterprise backup solution that exceeds your organizations' backup and recovery expectations. By combining Veritas NetBackup's world-class, unified data protection platform with Scality's award-winning RING software-defined storage solution, the result is unlimited linear scale, 14x9s of durability, and lower TCO — without being locked into proprietary hardware platforms.

### **Unified Data Protection for Physical and Virtual Environments**

Scality RING is Veritas NetBackup certified and specific configurations have been designed to meet the largest and most demanding data center environments, delivering

breakthrough capabilities for virtualized systems that go well beyond what traditional backup practices can achieve. In addition, Scality RING supports NetBackup MSDP Direct Cloud Tiering for efficient and cost-effective deduplication at the source.

With Veritas NetBackup you get a single, intuitive management console that reveals all backup and recovery activity and allows consistent policies and service levels to be enforced across the enterprise.

Using Scality RING to manage the physical storage for Veritas NetBackup delivers a level of scale, performance and durability at a TCO that tape and NAS-based targets could only dream of.

*Scality RING is Veritas NetBackup certified and specific configurations have been configured to meet the largest and most demanding data center environments, delivering breakthrough capabilities for virtualized systems that go well beyond what traditional backup practices can achieve.*

## Key benefits

### **Faster Recovery**

Unlike conventional network attached storage (NAS), Scality + Veritas enables high-density hard drive recovery in minutes, not days, reducing backup windows for large data sets and restore times. Complete parallelism and full scale-out file system support enables the storage throughput required to scale linearly across mixed workloads without degrading performance.

### **Lower Costs**

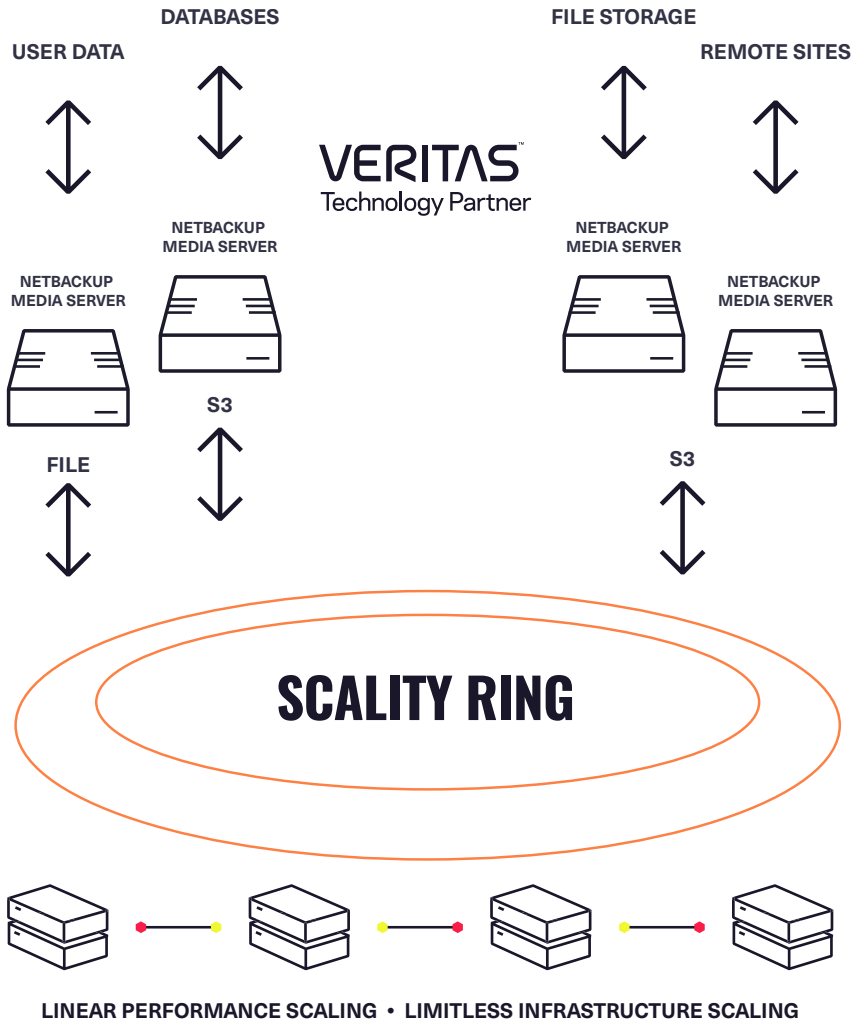

Scality + Veritas offer worry-free expansion while reducing TCO by up to 90%. Seamlessly leverage standard servers for to reduce training and maintenance costs — and for rapid scaling. Automatic rebalancing and self-healing enables efficient, cost-effective capacity expansion and server replacement for better overall lifecycle management.

### **Perfect Fit**

A safe, fast, affordable backup solution can alleviate massive amounts of pressure put on digital businesses. With the combination of Veritas and Scality, you get the same backup and recovery solution trusted in the world's largest and most complex heterogenous environments. Mutual certification ensure you aren't chasing vendors. Whatever the fit, we've got you covered.

### **Safer Data**

Enterprises demand data durability in the 14x9s with intuitive management. This combined solution meets demands while increasing data recovery times as compared to traditional systems. Extreme fault tolerance with geo-distributed deployment and configurable protection policies (replication or erasure coding) provide next-level protection.

### ABOUT VERITAS TECHNOLOGIES LLC

Veritas enables organizations to harness the power of their information, with information management solutions serving the world's largest and most complex environments. Veritas works with organizations of all sizes, including 86 percent of global Fortune 500 companies, improving data availability and revealing insights to drive competitive advantage. For more information, visit [www.veritas.com](http://www.veritas.com).

### ABOUT SCALITY

Scality® storage propels companies to unify data management no matter where data lives — from edge to core to cloud. Our market-leading file and object storage software protects data on-premises and in hybrid and multi-cloud environments. With [RING](#) and [ARTESCA](#), Scality's approach to managing data across the enterprise accelerates business insight for sound decision-making and maximum return on investment. To compete in a data-driven economy, IT leaders and application developers trust Scality to build sustainable, adaptable solutions. Scality is recognized as a leader by Gartner and IDC.
